

2025 IRS Form 1095-C now available

The IRS requires employers to report annually if an eligible employee had health insurance coverage on the Form 1095-C. This form includes information about whether employees were offered health coverage by the Nebraska State College System and during which months. The IRS does not require a copy of the 1095-C form to complete tax returns.

The Paperwork Burden Reduction Act no longer requires employers to mail a paper copy of the form to eligible employees. Paper forms will not be mailed to employee home addresses unless requested by the employee.
